WHAT HAPPENS

Each executive picks the enterprise result that is theirs to move this year, and puts a number on it in front of peers.

Sessions install directing at scale: choosing what to deploy where, orchestrating many projects and coaches so the whole portfolio moves, and shifting as results come in.

They report the number. No executive cohort has returned less than the committed 4X; the average runs past 6X.

WHAT CHANGES

- Executives who own one result out loud, not a portfolio of intentions
- A leadership system below them that runs on the same cadence
- Strategy that moves into execution instead of languishing
- The largest attributed impact per leader in the catalogue

HOW WE MEASURE

Each leader runs a High Impact Project against a real business number. Results roll up to the sponsor in dollars, with the Participant's own attribution of how much the experience contributed.

HOW IT FITS WHAT YOU HAVE

Maps to the competency model you already use. Runs as a module inside an existing leadership curriculum or as the immersive anchor a curriculum is missing. Reinforcement assets load into your LMS.

INVESTMENT

$1,800

Per Participant · same number in USD, CAD and EUR

Per Participant, cohorts of 8 to 32. The Orchestrate Impact role experience for executives (CP4). Impact project and coaching included; executive cohorts usually pair it with the 12-Month Impact Coaching Commitment at $4,000.

WHAT IT INCLUDES
